

## **Year 5 - Week Beginning Monday April 27<sup>th</sup>**

We'd love to see your work posted on Twitter using #BGP5. Don't forget you can save work to your Hwb account too so we can see all the brilliant work you are carrying on out at home. Don't forget to keep fit and active - Joe Wicks helps here! Please use other websites you may find and also don't forget to read a little every day.

### **Monday**

Start the week with some reading but reading to review. I want you to try something different. On this website you will find a lot of stories about spring from around the world - some a lot better than others! Your task for today is to read AT LEAST THREE of the books (they are only short) and write a book review for them. Think about the level of the book, the language used in it and whether you would recommend it to others to read. Maybe use a star rating for your book. <https://www.storyjumper.com/book/search/q/spring>

### **Tuesday**

- Practice your times tables today. Start off with TT Rockstars. That will keep adapting to the table you need to be working on. Maybe use the J2Blast site as well.
- We haven't looked at numbers for some time so we are going to try some rounding. There are LOTS of different levels of work here for you so you can start off with easy steps and make it harder as you go along. Start with the Top Marks website - it will help you understand rounding numbers as you can set the level you want to work at..

### **Wednesday**

Where I live, I can see and hear things changing around me. Every year, Mrs. Roberts knows Spring is well and truly on the way when she hears the cuckoo. It's your turn to let us know about the changes you have seen happening around you. You can do this by looking from your window, going into the garden or by researching on line the changes you would see in spring. (The stories from Monday would help you here.) We like you to be independent learners so use your research skills to find websites to help you and think of a way of recording your answer - poem, picture, dairy entry, labelled diagram, mind map, poster etc. You could even take photographs. That's something different!

### **Thursday**

- Ten minutes practising your times tables to warm your mind up!
- Try some Pirate Rounding. You need to scroll down to the bottom of the page until you find the pirate game. Click on play to begin the game. <http://www.math-play.com/Rounding-Numbers-Pirate-Game.html>

### **Friday**

This term we would be learning about Africa as our topic. Before we begin any topic, it's nice to pull together all that you do know already (activating your prior knowledge), and also think about what you want to find out. Either record this on paper or using your J2E account. Divide your page into two columns - What I Know and What I Want To Learn. Think about using colours to make it colourful and creative. You could even prioritise your questions if you work on line as it is easier to move the questions around and re-order them.
